

FRONT-END DEVELOPER (HTML5, CSS, JAVASCRIPT)

Position

InTech Energy – www.intech.energy – Join our growing firm to help us enhance our energy monitoring and building automation solution for commercial buildings. We are looking for a mid to senior level Front-End Developer to be part of our cutting edge software engineering team. This person will be primarily focused on InTech's cloud-based commercial building software and will own many facets of the front-end process from initial wireframe design to the front-end code. This is an ideal role for a developer that is passionate about creating high-end interactive websites and has experience in HTML5, CSS, and Javascript. Exposure to ASP.NET MVC and unit testing is strongly desired.

Qualifications

- BA/BS degree in Computer Science, Graphic Design, Interaction Design, Visual Design or an engineering equivalent is required
- 3+ years experience developing HTML5, CSS, Javascript and other front-end technologies
- Must have knowledge of or willingness to learn ASP.NET MVC and unit testing
- Must have a strong portfolio which demonstrates creativity and mastery of responsive and data-driven websites
- Exposure to Adobe Photoshop, Illustrator, Sketch, InVision or similar design tools is desired. HighCharts and d3 knowledge a plus

Responsibilities

- Work within our visual design and development team to design, create and communicate user flows with visual and active HTML mockups
- Design and code out enterprise-grade HTML5, CSS and Javascript interfaces using responsive design techniques that work across different browsers, devices and screen sizes
- Ability to iterate designs based on feedback from the team / stakeholders
- Update the full development team in daily scrum meetings
- Participate in twice-monthly sprint planning sessions and thoroughly understand business requirements of the energy application
- Maintain a disciplined approach to writing task lists and performing continuous quality assurance

Other

This is a full-time position based out of our office in Pleasanton, CA. This position will be a key member of the InTech software development team.

Benefits

- 3 weeks Paid Time Off per year
- Opportunity for bonuses and stock options
- Work with a team of smart, ethical, and passionate "A-players"
- Stable and competitive salary compensation
- 401k retirement plan and health insurance plan

About the Company

InTech Energy is a well-funded and profitable software development firm that builds web-based energy efficiency applications focused on energy monitoring and building automation. One of

our key products helps commercial building owners reduce energy and save money on their utility bill while maintaining occupant comfort. We also provide energy efficiency software applications to entities such as Southern California Edison and the California Public Utilities Commission.
